## Apartament amplifiers ATP-400 series

Models for terrestrial signals, adapted to the 1st and 2nd Digital Dividend.

Ideal for extending the household network

Models adapted to the 1st and 2nd Digital Dividend

Gain adjustment

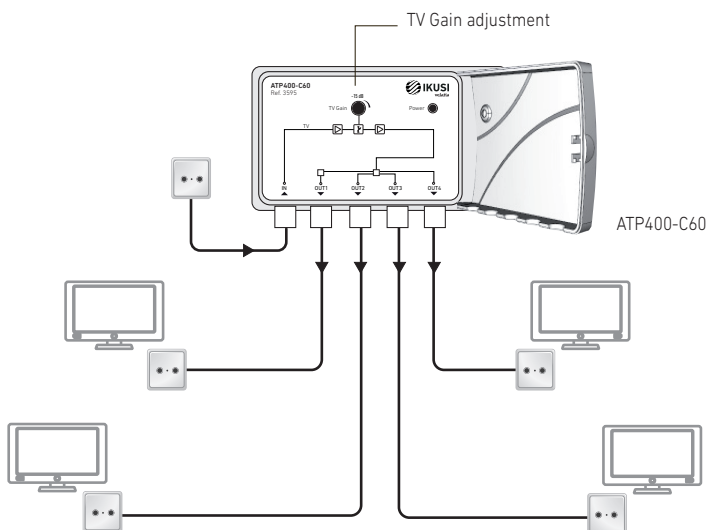

ATP-400 amplifiers

## Main features

- Models adapted to the 1st and 2nd Digital Dividend.
- Terrestrial signals.
- Gain adjustment potentiometers.

MODEL	REF.	ATP-400 series	
ATP-400-C69	3594	Frequencies MHz	47 - 862
ATP-400-C60	3595		47 - 790
ATP-400-C48	3596		47 - 694
Input			1
Output			4
Gain	dB		>22
Gain adjustment	dB		>15
Output level	dB $\mu$ V		103 IMD3 -60dB (DIN 45004B)
Noise figure	dB		<4
Mains supply voltage	VAC		100 - 240
Consumption	W		<3
Dimensions	mm		135 x 70 x 30

## Installation example

## Quick Fix & Release bracket
